Scheduling Wallpaper Changes

When you've created multiple wallpaper profiles, you can associate them with monitor profiles, but you can also schedule times/events for their application. Follow the directions here to schedule your wallpaper profiles.

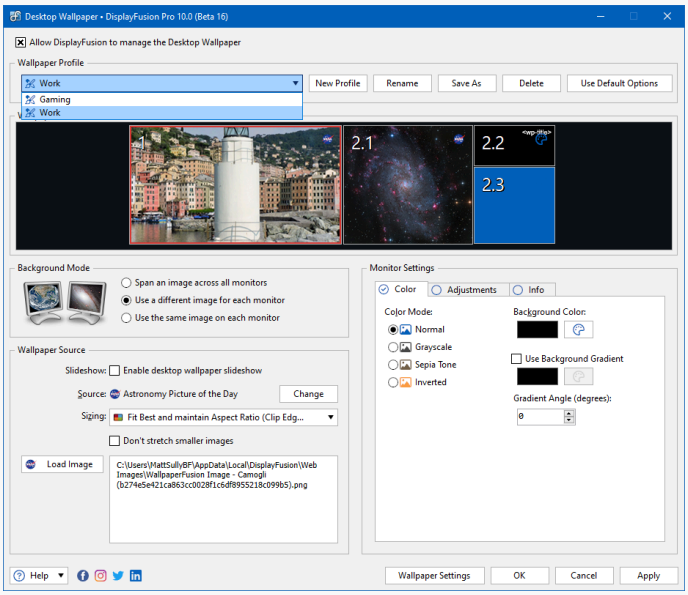

> For best use of this option, two or more Wallpaper Profiles are needed.

Confirm or Configure Multiple Wallpaper Profiles

- Right-click the DisplayFusion tray icon and click "Desktop Wallpaper." *You can also access this via the Options tab in Settings.*

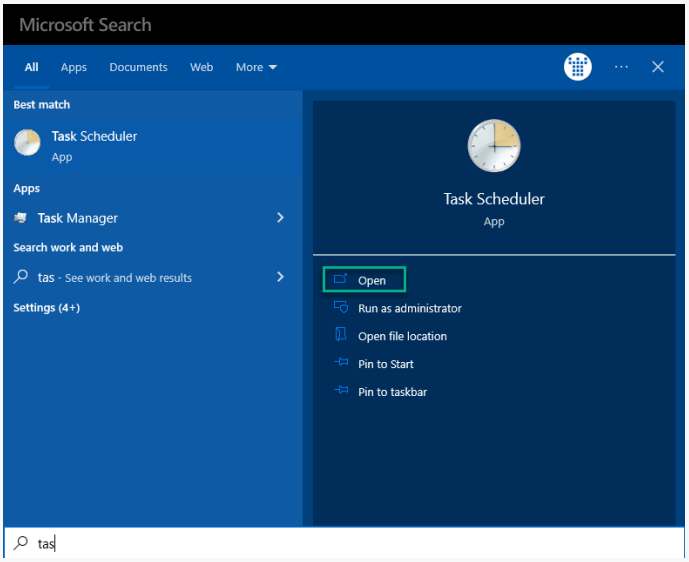

- Click the Wallpaper Profile dropdown.

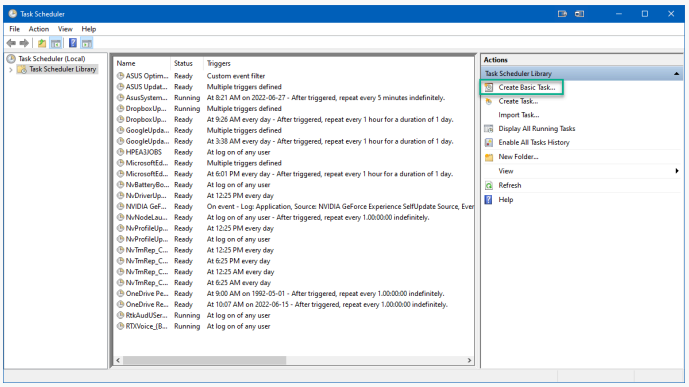

If you have two or more Wallpaper Profiles, continue to the directions below. Otherwise, create additional profiles before continuing.

Configure the Task Scheduler

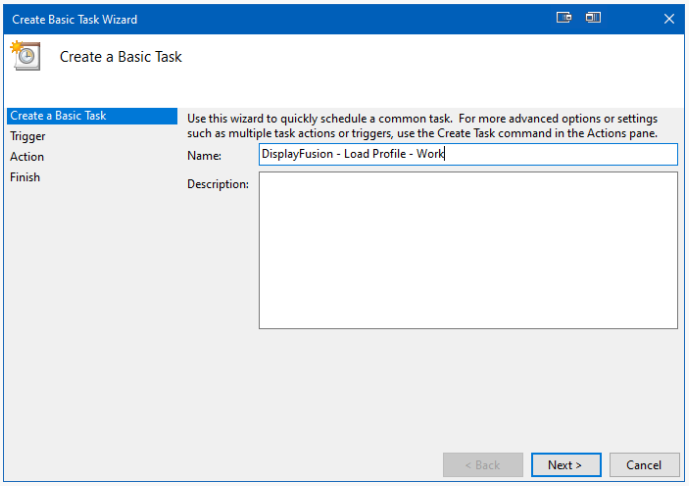

- On your computer, open the Windows Task Scheduler.

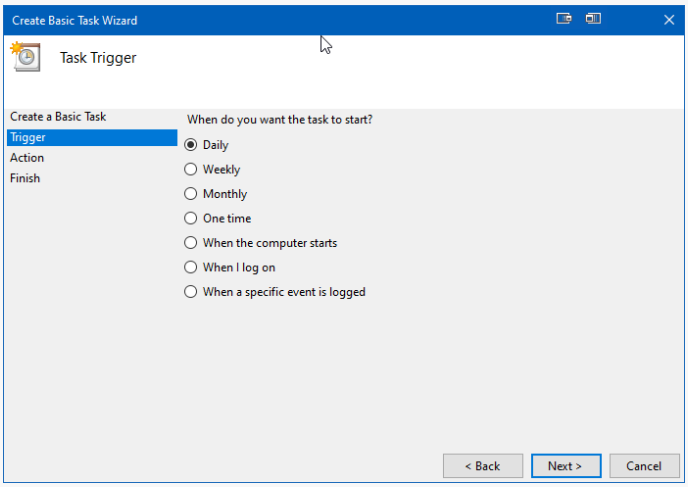

- Click "Task Scheduler Library" in the left pane, then "Create Basic Task..." in the right pane.

- In the wizard, enter a name for the task (For example: "DisplayFusion - Load Profile - Work"), then click "Next."

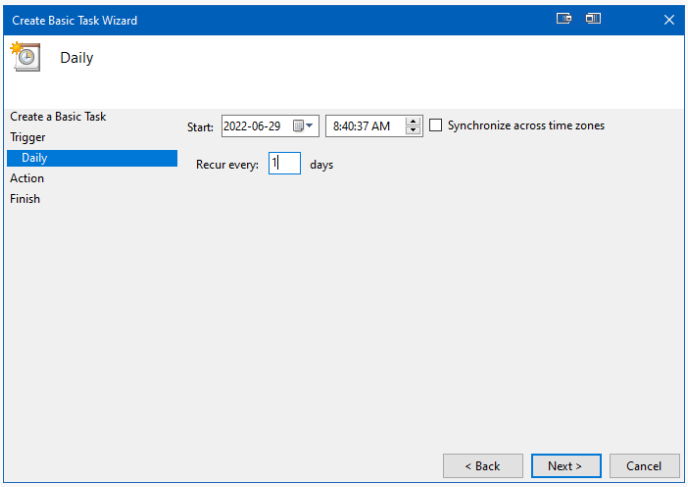

- Select when you want the task to run, then click "Next." (For example: If you want to load the Sunrise profile every morning, choose "Daily.")

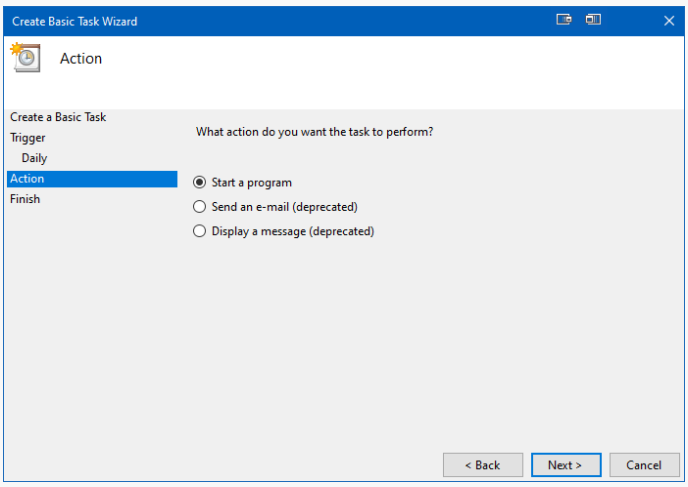

- Choose the time you want the task to run, then click "Next." (For example: 8:40AM)

> Other options will alter or remove this step.

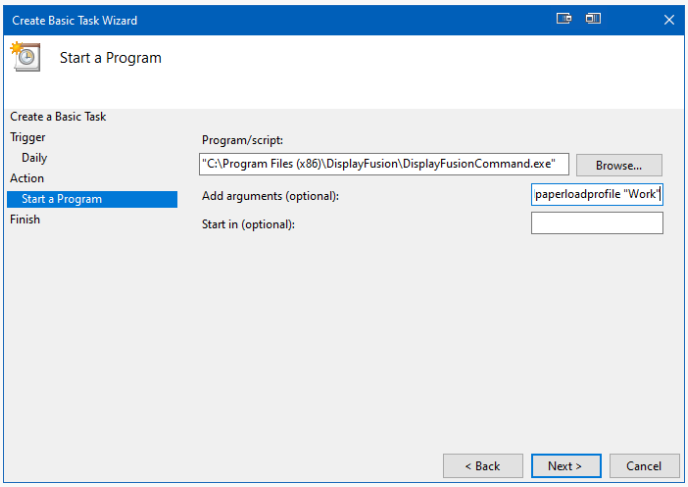

- In the Action step, choose "Start a program," then click "Next."

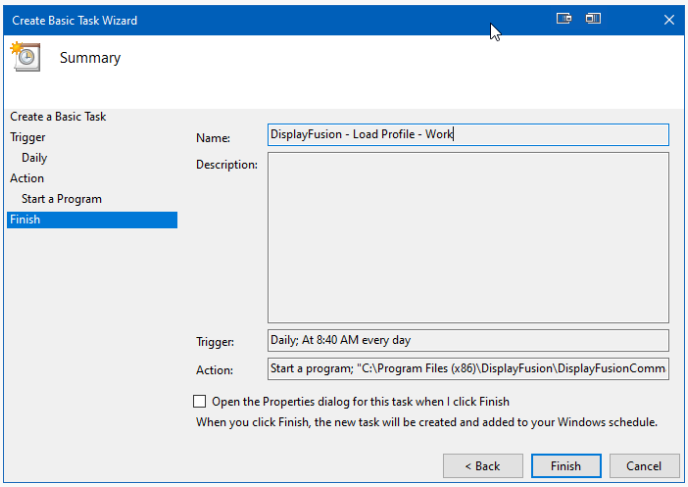

- In the "Program/Script" text box, enter the full path to DisplayFusionCommand.exe. (For example: "C:\Program Files (x86)\DisplayFusion\DisplayFusionCommand.exe")

  In the "Add arguments" text box, enter `-wallpaperloadprofile "Profile Name"` then click "Next." (For example: "`-wallpaperloadprofile "Work"`")

- Review your settings, then click "Finish."

To schedule additional Wallpaper Profiles, repeat the steps above. To schedule a Wallpaper Profile at random, see this guide: **Randomly Load a Wallpaper Profile**

About DisplayFusion

DisplayFusion gives users power and precision over their multi-monitor setup, with automation and customization options to create the perfect displays, every time.
